WE **ALL** HAVE AN **ETHICAL DUTY TO REFURBISH** OUR MEDICAL INSTRUMENTS

Our European manufacturing partners offer reliability, speed, and sustainability

Product resilience and availability has been an issue since COVID in many areas. This has caused availability issues, cost escalation and transit challenges from the East. NHS Supply Chain established their resilience team in 2022 and we saw this as a key opportunity to see how we could help out and support this.

We decided to work with Telic and VEC Medical as key partners, due to their manufacturing being in Barcelona and their resilience focussed, single-use consumables. A reliable supply chain is ensured through availability and shorter delivery times due to the manufacturing location and the quick ease of transport from Spain, by road or sea.

+ **We're proud to partner with Telic and VEC Medical to offer the high quality consumables shown in this brochure**

Cover for Surgical Light Handle

Designed to prevent surgeon contact with the lamp handle during the surgical procedure.

The cover is sterile and completely covers the lamp handle.

Available in two sizes.

| Reference	Code	Size	Compatible with handle	Units/Pouch	Units/Box
LHC-01	TCF0A	95x120mm	Ø 20-40mm	1	100
LHC-03	TCF0C	95x150mm	Ø 20-40mm	1	100

STERILE EO   Class I sterile

Vein Strippers

Dormo-Strip vein strippers, made entirely of polyamide and with an average tensile strength of 25kg for conventional or invagination stripping.

Each Dormo-Strip consists of 2 cables 100cm long, 3 different size olives and 1 handle.

Individually packed (1 bag, 1 kit), in boxes of 12 units.

15.4mm   12.8mm   9.5mm

Defibrillation Electrodes with Cable

Desfi-Dormo defibrillation electrodes with cable are compatible with a wide variety of brands and models of defibrillation equipment.

The versions for adult patients are multifunction and can perform defibrillation, synchronised cardioversion and ECG monitoring procedures, although the compatibility with these functions will depend on the characteristics of the defibrillation equipment they work with.

Check the tables for the suitability of the connector with the equipment with which the electrodes must work and, if in doubt, consult your Surgical Holdings representative.

- Our electrodes are manufactured under the EN IEC 60601-2-4 standard.

- Supplied in packs of two defibrillator pads, in boxes of 10 packs.

- Available for adult and paediatric patients.

Class I

Pre-Connected Defibrillation Electrodes

The pre-connected Desfi-Dormo defibrillation electrodes allow faster and more effective action in case of emergency, as they can be directly connected to the defibrillator equipment.

The versions for adult patients are multifunction and can perform defibrillation, synchronised cardioversion, and ECG monitoring procedures, although the compatibility of these functions will depend on the characteristics of the defibrillation equipment they work with.

They are compatible with a wide variety of brands and models of defibrillation equipment. Check the tables for the suitability of the connector with the equipment with which the electrodes must work and, if in doubt, consult our commercial team.

- Our electrodes are manufactured under the EN IEC 60601-2-4 standard.
- Supplied in packs of two defibrillator pads, in boxes of 10 packs.
- Available for adult and paediatric patients.

ECG Electrodes

We have a wide range of Dormo electrodes for cardiac monitoring, which allows you to choose the most appropriate electrode for each circumstance, no matter how demanding it may be. Electrodes for short monitoring, stress tests and resting tests, and for adult, paediatric and neonatal patients.

For resting tests

Dormo-Tab resting electrodes help optimise testing costs.

With acrylic gel and a safe, soft and comfortable adhesion, which conforms to body shape, and its practical tab, which easily connects to the clamps, they are the best option for the diagnosis of patients at rest.

Radiotransparent.
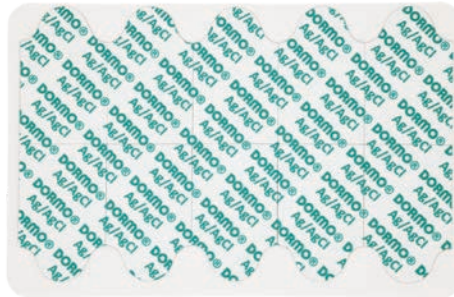

Reference	Code	Patient	Measurements	Gel	Units/Pouch	Units/Box

Class I

ECG Electrodes

For short monitoring with foam backing

EKF-22KT   SX-30   SF-40   LF-40   LF-50   SM-36

Dormo electrodes for short monitoring allow excellent results in short-term diagnostic tests. Their foam backing guarantees precise adhesion, and the stud connection and the solid or semi-liquid hydrogel texture adapt to any need in ECG tests.

Yankauer Suction Set

Yankauer disposable Suction set reduces cross contamination and blocking risks. Intended to remove blood and similar liquids during surgery.

• Made of semi-rigid, malleable, non-toxic transparent PVC, which makes seeing the draining easier
• 2 to 4 open distal holes and atraumatic on the sides
• Anatomic handle, which makes it easier to hold it (comfortable grip)
• Great connection allows perfect adaptability to vacuum or suction tubes
• Two end options, with or without suction control
• Universal proximal end. 3 metre tube
• Sterilised with ethylene oxide

Symbol Key

HIGH CURRENT MODE <1100mA	Suitable only for high energies, up to 1100mA
CONVENTIONAL PROCEDURES ONLY	Suitable for conventional procedures only
COMPATIBLE REM	Compatible for connection with electrosurgical units with REM function
LATEX	Does not contain natural rubber latex
2	Do not re-use
STERILE EO	Sterilised using ethylene oxide
STERILE R	Sterilised by gamma radiation
RADIOPAQUE	Radiopaque
>24h	Time limit for use

Manufacturer and Repairer of Surgical Instruments

SM△RT REPAIR

SURGIFIX
ONLINE PORTAL

Smart Repair is our unique repair service for surgical instruments, offering the promise of long-term value for money in choosing the sustainable option, and a product replacement if we are unable to return the instrument to a 'as new' condition*.

In choosing our innovative Smart Repair service, customers benefit from dashboard access to our Surgifix Online Portal, enabling you to book, manage and monitor repairs online with your own assigned log in. Instantly communicate directly with the repair team to stay up-to-date with the live progress of repairs and the option to view historical scope repair reports.

Promoting education; sharing knowledge and offering training opportunities
